

INDEPENDENT CONSULTANT | ANTANANARIVO | INTERNATIONAL

FROM RISK TO ACTION.

Independent consultant helping NGOs and humanitarian agencies turn risk analysis into practical, operational and fundable action.

ANTICIPATORY ACTION

DISASTER RISK REDUCTION

OPERATIONAL READINESS

RESPONSIBLE AI ADOPTION

72h

Cyclone anticipatory
action lead time

4,000

Households in drought
early-action planning

15+

Years of humanitarian
field experience

BRING ME IN WHEN YOU NEED TO...

Seven entry points, one objective: make analysis usable in real operational systems.

01

Design an anticipatory action system

Build or strengthen triggers, Early Action Protocols, readiness arrangements, pre-agreed actions and decision-making processes.

02

Diagnose what is blocking preparedness

Assess institutional capacity, operational bottlenecks, coordination gaps and the conditions needed for early action to work.

03

Turn strategy into an operational programme

Translate ideas into theories of change, logframes, implementation models, technical frameworks and donor-ready proposals.

04

Strengthen institutions and operating systems

Develop SOPs, governance arrangements, coordination mechanisms, simulations and practical capacity-building frameworks.

05

Review a programme before problems become expensive

Provide independent technical review, troubleshooting, quality assurance and focused advisory support for complex programmes.

06

Facilitate a process that needs to move

Design and lead workshops, consultations and technical processes that end with clear decisions and next steps.

07

Connect AI tools to operational decisions

Identify where AI adds practical value, redesign workflows and connect predictive outputs to clear responsibilities and proportionate action.

Responsible adoption - not model development. Tools must fit operational reality, accountability requirements and institutional ownership.

THE LEVEL OF SUPPORT THE PROBLEM NEEDS.

01 / RAPID DIAGNOSTIC

Find the real bottleneck.

A focused review for a programme or operating process facing a critical decision.

5-10 DAYS | BOTTLENECK MAP +
DECISION BRIEF

02 / SYSTEM DESIGN

Build the architecture for action.

Structured design support for an EAP, operating framework, SOP package or programme model.

3-8 WEEKS | DESIGN +
IMPLEMENTATION ROADMAP

03 / ONGOING ADVISORY

Keep senior support close.

Flexible input for teams designing, implementing or scaling complex programmes.

AGREED DAYS / MONTH | REMOTE OR
MISSION-BASED

03 / SELECTED ASSIGNMENTS

Selected work undertaken in Madagascar between 2023 and 2026 as Anticipatory Action & DRM Delegate for the German Red Cross, embedded with the Malagasy Red Cross.

72h

Cyclone anticipatory action

Connected meteorological thresholds, readiness arrangements, coordination and field implementation during the Malagasy Red Cross's first cyclone anticipatory activation.

4,000

Drought early-action planning

Designed triggers and implementation arrangements for a framework combining cash, WASH, early warning, community engagement and protection.

SYSTEMS

Institutionalisation

Supported governance, SOPs, simulations and institutional readiness linking national authorities, technical services and humanitarian partners.

FIELD-GROUNDED. SYSTEMS-FOCUSED

- **Field-grounded**
Recommendations are tested against operational reality before they reach the page.
- **Bridge-builder**
Translate between technical teams, decision-makers and the institutions expected to act.
- **Trilingual**
Advisory, workshops and documents in English, French and Spanish.
- **International**
Madagascar-based, available for remote and field-based assignments.

RESPONSIBLE AI BY DESIGN

TOOLS MUST FIT THE SYSTEMS THAT USE THEM.

- Use non-sensitive, anonymised or institutionally approved materials.
- Apply approved tools and respect organisational data-protection rules.
- Keep human verification and professional judgement in the loop.
- Address bias, accountability, ownership and operational adoption.

Applied workshops can be included within a diagnostic, design assignment or advisory engagement.

LET'S WORK TOGETHER

HAVE A COMPLEX PROBLEM?

Start with a focused 30-minute scoping call. We will clarify the problem, the decision you need to make and whether I am the right person to help.

BOOK A 30-MINUTE CALL
